Catalogue**

# SCOONIE HOBBIES

## *Ninth Fittings Catalogue*

*Welcome to our catalogue. Our first seven were not glossy picture filled feasts, so this one isn't either.(Why change the habits of a lifetime.) So again, we haven't had the brass neck to charge for it. All we ask is that you make a donation the next time you see a MacMillan Cancer Support collecting can. (This may well be on the stand, or in the shop.) We've replaced some of the previous garbage with some stuff unworthy even of Christmas Crackers.*

*Prepare to cringe!*

*Yours Aye*

*Andy and Steve*

***THE LOONIES FRAE SCOONIE***

***In Scoonie's Store***

***There's things galore***

***Including cheek and laughter.***

***You'll be supplied,***

***You're not denied.***

***We'll give you what you're after.***

*With thanks to Peter Mulvanny for the above*

**ABOUT US**  
**THE SAGA CONTINUES**  
**A LONG TIME AGO,**  
*IN A GALAXY FAR, FAR AWAY –*

So started our first catalogue. So we'll start this one with:-

**NOT SO LONG AGO,**  
**IN A GALAXY FAIRLY CLOSE AT HAND-**

In 1972 a guy by name of Ian Wares started Scoonie Hobbies in the wee town of Leven, then moved it to Kirkcaldy, both towns being on the East coast of Scotland.

In January 1988 Andy McCue took over and turned the business upside down, making it the lunatic shambles it's been ever since. Andy started as a serious modeller in 1961 when he joined the Air Training Corps and was introduced to the mysteries of aeromodelling. After a long lay-off once he'd discovered women (during which time he was also heavily into military modelling), his interest in railway modelling re-surfaced. Living in an East Neuk of Fife fishing village, it followed on that he took up boat modelling. He still can't work out how he found time to go to work, especially when you consider he was also in the Territorial Army! However, it all stood him in good stead when he took over the shop.

His son Steve joined him 6 years later (you'd have thought he'd have known better) and (slightly) reduced the chaos Andy had created. Although an all-round modeller, Steve's expertise lies in cars, be it radio controlled, slot-car, die-cast or plastic kit. Steve is now a partner in the business. He runs the shop while Andy does the shows. His daughter Lauren and son Grant are still a bit young to be involved .

Grandson Jack has been in the shop for an hour's staff training every Saturday from the age of 2. There's a long lead time training staff for a hobbies shop!

Jack , at 5, was the youngest driver in the BRCA and is turning into an avid car racer and railway modeller. He may shortly be joined by his wee brother Joe, born in October 2003. Jack and Joe share the same initials – JED. The plural of JED is JEDI--'nuff said.

Andy's wife and two daughters are still dragooned into helping. Andy's wife (Chris) sees to all of the typing (including this catalogue), corrects Andy's spelling, deplors his grammar and stops him from blowing up another computer. How she's put up with him for all these years no-one knows. June (another JEDI as her Christian names are June Elizabeth) helps out in the shop and copes with two potential modelling lunatics (Jack & Joe). Kirstie (younger daughter and cavalry division of Scoonie Hobbies) is in the shop on Sundays and helps out at shows. Somehow the three of them (known collectively as "Andy's Angels") manage to bring a wee bit of sanity to the proceedings. Just in passing, there cannot be many shops in the world who can boast of THREE Jedi on the team!

Just recently Tony Campbell joined the team part time. (he couldn't stand the lunacy full time.) He is superb on all aspects of radio and IC engines and is a very competent aero modeller. He has experience of plastic and boat modelling. (Andy's still working on the model railway indoctrination.) Be warned Tony has an even more evil sense of humour than Andy or Steve and was responsible for some of the better(?) quips in this rubbish.

Last but by no means least, we must mention Findlay, our engineer and ultimate all round hobbyist. Very sadly Findlay passed away in the Autumn of 2002. He is very sadly missed by all who knew him. A mutual friend summed him up best when he said " I've never known anyone so quiet, shy, retiring and modest; yet totally brilliant at everything he turns his hand to". Findlay bound his own books, made wine, grew tobacco, built pond yachts, scratch built model railway loco's, made masters for hulls,

made electronic gadgets, drew plans and set up a superb modeller's archive on his computer.

That is the team, and that is the story-----SO FAR

## **GENERAL CONDITIONS**

- 1. The attached price lists were accurate when printed. (That's the good news.) The bad news is that they must be subject to alteration without notice as we are at the mercy of currency fluctuations in respect of imported items, especially those from the Far East. Also, we are normally in stock of all items, though there have been occasions where we have been caught out by unexpected demand or difficulties in obtaining stock from suppliers. Because of both of the above reasons it is advisable to phone to check prices and availability before ordering.**
- 2. Postage and Packing (UK Mainland)**  
Large parcels are sent at a starting rate of £10.00 per parcel. Small parcels of fittings, motors and gearbox orders are sent at a flat rate of £8.50. This also applies to orders for servos, etc. crystals and receivers. Single propellers attract a cost of £3.50 in addition to the cost of the article. This charge also applies to propeller shafts. Goods will normally be sent off within 2 working days of payment clearance, however this may be disrupted due to attendance at shows.
- 3. Overseas Orders**  
Overseas orders are supplied Ex Works. Please e-mail or telephone for shipping arrangements.
- 4. Payment**  
Credit Card for mail order UK Mainland only. We can only accept cheques drawn on a UK bank, UK Postal Orders, Sterling Traveller's Cheques or International Money Order. Please do NOT send cash through the post unless it is by Registered Post.
- 5. Our fax back order form should be used wherever possible. Please fax in during the day as the Fax machine is now turned off outside shop hours due to the number of "junk" faxes littering the floor when we arrived in the morning! This form can also be used for postal service accompanied by your cheque.**
- 6. All sizes in the fittings' catalogue are approximate, being taken from manufacturers' lists or by measurements using Andy's (old) bi-focal specs and his (badly worn) steel rule.  
If we've made a mistake, blame the manufacturers or Andy's old equipment**
- 7. It is regretted that flammable or toxic materials cannot be sent through the post. This includes enamel paints, solvent glues, model fuels and batteries**
- 8. It is regretted that cheques require to clear the banking process before goods are sent out. This will require at least seven working days before your order can be processed. This only applies to orders supported by cheque payment and is due to the actions of one fraudster.**
- 9. Please remember that we CANNOT accept credit card details over the internet.**
- 10. Once an order has been placed, you have the right to cancel it at any time within 7 working days of your receipt of the goods; and return the goods to us undamaged and unused, and with the original packaging. We guarantee to give you a full refund, including P&P, within 30 days of your order cancellation. If you do wish to cancel an order you must do it in writing by letter, fax or e-mail.**

On to the bit you've been waiting for:-

## THE CATALOGUE

### A. Key to Abbreviations

B = Brass, P = Plastic, R = Resin, W = Wood, WM = White Metal, NS = Etched Nickel Silver, CM = Coated Metal, M = Metal

### B. Errors and omissions excepted. We reserve the right to change prices and specifications without notice.

NB % used to denote degrees \* = Suitable for Grain Of Wheat Bulbs

### **ANDY'S TIP**

**If, after 6 attempts, you still can't fit that little 2mm doo-hickey into the impossible location that the kit manufacturer says it MUST go into, then hit the whole lot several times with a 6lb hammer. You'll have no bother with that ever, ever again.**

### **Radars**

7FR1302	Radar Housing 35mm dia 22mm tall (P)	£5.60 each

4HBSENMP030	Anchor Winch 2 Gypsies, Central Roller 35mm Over Gypsies (25mm over base) Roller 15mm Wide, 20mm front to rear, 18mm high (P & Alloy)	£11.35

### **Old Git's Musing**

**When I'm finally holding all the cards why does everybody else start playing Chess?**

**I was in the pub with my wife last night and I said "I love you". She said "Is that you or the beer talking?" I said "It's me talking to the beer."**

### **UPGRADE YOUR REVELL/MATCHBOX CORVETTE**

1:72 Single Oerlikon MkII Mount (WM)

Part No:- E3J301 £19.00

### **RUNNING GEAR SET FOR CORVETTE**

Torpedo 385/400 motor with 2.5:1 reduction gearbox, coupling, 6" shaft and 40mm 3 blade brass prop (not May Island), Brass Rudder (4FRUDS in catalogue)

This combination will run using a 10amp capacity speed controller on 6 volts..

Part No:- RGC £61.45

### **STEVE'S TIP**

**Always borrow tools/glues/paints/brushes/materials/plans from a pessimist----- He doesn't expect them back.**

### **Motors and Gear Sets**

#### **Gear Sets**

##### **Olympus 540 2.3:1 Reduction**

Single ballrace, belt drive unit. Fits any 540 Can size motor. Intended for Aeromodelling, modified for Marine Modelling use.

On its own	£16.40
With Torpedo 500 Low Drain Motor (You fit)	£24.55

**The Olympus 540 will enable the motor types to drive a MAY ISLAND scale prop up to 75mm diameter.**

918D100112/1	280 size Motor fitted to 100:1 Reduction Gearbox (Metal Gear Train) 12-24v	£11.30
918D30112/1	280 size Motor fitted to 30:1 Reduction Gearbox (Metal Gear Train) 12-24v	£11.30
950D2.5.1	385 size Motor fitted to 2.5:1 Reduction Gearbox (Metal Gear Train) 4.5-15v	£20.50
950D61	385 size Motor fitted to 6:1 Reduction Gearbox (Metal Gear Train) 4.5-15v	£20.50
D1105/16	500 size Low Drain Motor fitted to 2.5:1 Gearbox (Metal Gear Train) 6-12v	£21.55
D1105/7	500 size Low Drain Motor fitted to 6:1 Gearbox (Metal Gear Train) 6-12v	£21.55
D1105/4	500 size Low Drain Motor fitted to 11:1 Gearbox (Metal Gear Train) 6-12v	£21.55
1114/5	Torpedo 800 Belt Drive Unit . Torpedo 800 motor fitted to a precision 2.1:1 belt drive system	£61.50
1115/5	Torpedo 850 Belt Drive Unit. Torpedo850 motor fitted to a precision 2.1:1 belt drive system	£61.50

All of the above gear units include motor mount.

941D621	Miniature Motor & Planetary gearbox 62:1 Reduction 1.8-12v	£19.50
---------	---	--------

**Andy had a crash with the van. The man whose car he hit was only three feet tall.**

**“I’m not happy,” he said.**

**So Andy said”Which one are you then?”**

## **MOTORS**

### **Torpedo 800**

A 12 volt motor giving a no load speed of 5167 RPM with a current draw of 1.058 amps. At maximum efficiency the speed is 4289 RPM with a current draw of 5.28 amps. The cost is £25.60

**Torpedo 850A** 12 volt motor with a no load speed of 9778 RPM and a current draw of 1.90 amps. At maximum efficiency the speed is 8311 RPM and current draw is 10.82 amps. The cost is £25.60

### **Torpedo 500**

3-Pole 540 can size motor fitted with suppressors, lead and Tamiya style plug. This motor will run quite happily on 6 volts with a 10amp capacity speed controller. With the Olympus 540 gearbox this motor will drive a propeller of up to 75mm on a hull of up to 48”. The operating range of the motor is 4.5–15 volts. The cost is £9.25

Motor Supressor Set

BS259 Set of 3 supressors suitable for the above motors. £1.05 per

## **MTRONICS SPEED CONTROLLERS**

We now stock the Mtonics range of electronic speed controllers. These are all British made and are waterproof.

The ones we stock are:-

<b>Micro Viper Marine 10,</b>	10amp limit brushed motor ESC
<b>Viper Marine 15,</b>	15 “ “ “ “ “
<b>Viper Marine 20,</b>	20 “ “ “ “ “
<b>Viper Marine 25,</b>	25 “ “ “ “ “
<b>Viper Marine 40,</b>	40 “ “ “ “ “

## **MECHANICAL SPEED CONTROLLERS**

### **BOB’S BOARDS**

For some time now we have been surprised at customers’ reaction at shows when they discover (1) that we know what Bob’s Boards are and (2) that they have NEVER been unavailable. We normally have these in stock.

4EPB3 (2.5 - 4 amps)	£10.25
4EPB5 (4 - 6 amps )	£10.25
4EPB8 (Up to 8amps)	£12.35

**Unfortunately production of Bob’s Boards is coming to an end . We will continue to stock them for as long as we can. Please e-mail or phone for availability.**

### **ANDY’S TIP**

**Tired of slicing your fingers to bits with your scalpel? Have somebody else hold the work while you slash away with the knife.**

**Unfortunately, at the time of going to press we were in the position of having to find another engineer to make our prop shafts and propellers as our previous engineer had to retire due to ill health. Consequently stock levels were extremely low and existing prices could not be guaranteed as we did not know what manufacturing prices would be with the new engineer.**

**It is essential to phone or e-mail to check current prices and availability of shafts and props before ordering. Sorry for this inconvenience, normal service will be resumed as soon as possible**

## MAY ISLAND BOAT SHAFTS

Our range of shafts has been developed to make life easier when drilling through the deadwood at the stern to fit the shaft. All shafts are stainless steel running in bushes which have an average surface bearing area of 150 square mm (M4) and 170 square mm (M5).

### **M4 Threads (6mm Approx dia Shaft Outers)**

### **M5 Threads (7mm Approx dia Shaft Outers)**

<b>Length</b>	<b>Cost</b>	<b>Length</b>	<b>Cost</b>
4"	£7.50	5"	£9.60
5"	£8.50	6"	£9.80

12"	£11.25	13"	£13.35
13"	£12.50	14"	£14.05

### **SLIMLINE SHAFTS**

The following are all 4mm outer, M2 threaded one end, 2mm plain other end.

15F409	150mm outer tube length	£6.70
15F413	55mm " " "	£5.75
15F414	140mm " " "	£6.90
15F416	180mm " " "	£7.70
15F3369	114mm " " "	£4.10

### **Couplings**

Dyco Type Coupling (B & P), Various Sizes & Combinations.

Please state size required. £7.70

BF394 Small Billings Dog-Bone (B & P) 2.3mm to 3mm plain £9.35

**Please remember to phone or e-mail for current prices and availability. Shaft specification may vary from the above.**

**The wife has been missing for a week now. The police said to prepare for the worst. So I've been back to the charity shop for her clothes.**

## Propellers

**PLEASE SEE NOTE ON PAGE 20.** We still have not been able to replace our engineer and will continue to supply May Island props for as long as possible. However there are gaps in our stocks which are being filled with excellent cast Brass props which do not have the grub screw through the boss. **It is essential to phone or e-mail the shop regarding availability, type and price before ordering. We are sorry for not being able to show prices. There have been some horrific increases which seem to be occurring with every shipment.**

May Island Brass Model Boat Propellers are made by, and exclusively for Scoonie Hobbies. They are each fitted with a grub-screw so that, when fitted properly, they cannot be lost. They are soft soldered so that, if a propeller becomes very badly fouled with weed, it will shed the blades rather than damage the motor or speed controller or the model itself. As a matter of fact, so far as we know, none of our props have shed a blade due to weed yet.

Due to the range and number of propeller types, it is advisable to phone and query availability before ordering as we are sometimes out of stock.

All propellers are supplied either left or right hand throw.

**Hi Mate, I'm texting you from the Casualty unit. Turns out that the new Dyson Ball Cleaner isn't what I thought.**

## RADIO EQUIPMENT

Due to the tremendous variations in supply prices of radio equipment from the Far East, we have decided not to do a detailed price list for Radio Equipment – We do want this catalogue to last for a while without alteration. We mainly stock Hitec sets, servos, speed controllers, sailwinches, receivers and chargers. Frequencies covered by Hitec are 27, 35 and 40MhZ **and now 2.4ghz!** We also stock Tamco 2.4ghz sets and receivers PLUS the Planet and Spektrum receivers as well as special RX battery packs for Spektrum. We obtain Spektrum sets to customer's order. The best we can come up with for this section is to say that we are confident that we can match or beat magazine prices, inclusive of postage and packing – provided that it is an item we stock. We do stock most of the Hitec range.

### **Daft Definitions**

**WOOFies = Well Off Older Folk**

## **BECC FLAGS AND LETTERING**

We are an approved stockist of the above company's superb range of flags, lettering and ship markings.

The range of cloth flags is simply stunning, both in quality and ease of use. National, signal and even club flags and pennants are catered for.

The company also do a huge range of vinyl lettering, depth markings and decals in a wide range of scales to finish off your model. Need something special? BECC are happy to make special one-offs, provided that you can provide **EXACT** details of your requirements. Anything from scale car headlamps, instrument panels, to special aircraft decals.

The range is so large and continually developing that it is impossible to list here. Please contact the shop for prices and availability. If we don't have the item you need, we can obtain it for you quickly. This company's products are simply superb. Have a wee look at their web-site and down load their catalogue at :- [www.becc.co.uk](http://www.becc.co.uk)

### **Exam Howler**

**Q How are the main parts of the body categorised?**

**A The body consists of three parts – the brainium, the borax and the abdominal cavity. The brainium contains the brain, the borax contains the heart and lungs and the abdominal cavity contains the five bowels, A, E, I, O and U.**

## **GENERAL MODELLING**

You might not have realised it but, as well as being a specialist boat modelling shop, we are also an all round hobby shop. The following notes may be of interest if you fancy trying something different.

**RADIO MODELLING IS AS EASY AS A, B, C.....**

## **AERO, BOAT, CAR**

### **AERO**

#### **Kits and Engines**

Due to the fluctuations in currency values and the vagaries of stock holding by suppliers we have decided not to produce a price list, or even a list of kits which we can obtain. We are able to bring in equipment supplied by Amerang (Thunder Tiger etc), Ripmax (Black Horse etc.), Horizon Hobby UK (for Hanger 9 kits), J Perkins (for Seagull.) Please phone for availability and price.

So far as engines are concerned we have specialised in Thunder Tiger and are sure that we can at least equal – if not beat – magazine prices on those engines held in stock. (NB Magazine prices inclusive of p & p.)

#### **Bits ‘n’ Pieces**

We also carry a large selection of nuts and bolts, linkages, hinges, horns and other aeromodelling accessories.

#### **Fuel**

See us at an Aeromodelling show for discounts on Model Technics’ fuel.

Due to the continuing sad demise of local model shops we have, in conjunction with Model Technics, set up a system of bulk fuel delivery to clubs.

We are able to supply fuel to clubs at discounted Model Technics Recommended Retail Prices subject to the following conditions:-

- 1 Applications for this service must be made in writing on the club’s headed notepaper and must include the flying site and clubroom’s location.
- 2 The flying site / clubrooms must be AT LEAST 30 mile away from the nearest Model Technics stockist (we’ll check!)
- 3 Orders must be for a minimum of 24 by 4.55 litre containers.

- 4 Order quantities over 24 must be in carton quantities ( That is, one carton = 4 x 4.55 litre containers.)
- 5 The type of fuel ordered can be mixed within the carton quantities. (eg 2 x Castor Straight, 10 x GX5, 7 x Duraglo5, 5 x Irvine5 = 24 x 4.55 litre containers.)
- 6 Orders must be accompanied by your club's cheque in payment.
- 7 the only fuels supplied will be those manufactured by Model Technics Ltd.
- 8 Delivery will normally be within 7 working days of receipt of your club's cheque.
- 9 Deliveries can only be made to commercial premises. We CANNOT arrange delivery to residential addresses.

## **BOATS**

In addition to all the fittings, we also stock virtually the full range of Billings kits, together with some of those made by Aeronaut, Amati, Corel, Euromodel, Gertaud Burgel, Mantua, New Maquettes, Panart, Sergal and Victory Models. Any of the kits done by these manufacturer

## **CARS**

### **Electric Cars**

We carry the British made Mardave range of 1:12<sup>th</sup> scale carpet racer kits. They are of easy construction and sturdy, so that they are simple to repair when you break them. Spares are always in stock and are very inexpensive, so they aren't expensive cars to keep on the road. The low cost of spares means that we are able to keep a tremendous depth of spare parts for the Mardave range. A very inexpensive way to get into a fun hobby.

Other electric cars from Thunder Tiger such as 1:10<sup>th</sup> scale 4WD off-road buggies are also carried together with full spares back-up. These machines are now using brushless motor technology. Seriously fast and serious fun.

### **Fuel Powered Cars.**

We carry fuel powered cars from the Thunder Tiger range. These offer good value for money as they are almost ready to run straight out of the box. Available in either 1:10<sup>th</sup> or 1:8<sup>th</sup> scales 4WD buggies or trucks. Once again spares are relatively inexpensive so we are able to carry a good depth of spares across the range of Thunder Tiger cars. Indeed, if the importer receives a call asking where spares are available in the UK, they refer the inquirer to us!

All Thunder Tiger electric or fuel powered cars now come fitted with 2.4GHZ radio equipment as standard. No more worrying about crystals.

### **Exam Howler**

**Q Use the word “ Judicious” in a sentence to show you understand its meaning.**

**A Hands that judicious can be soft as your face.**

## Useful Things

We intend this section to be for items intended for one modelling discipline which are very useful for other hobbies. As time goes on this section will expand. If you can think of anything to go in here, please let us know.

### **Model Technics Trimline**

Originally developed and intended for coachlines on model aircraft, this is a very thin, self coloured, flexible film with a fuel resistant permanent adhesive. When applied to a clean dry surface and rubbed down, it is highly resistant to peeling and creeping. It can be readily deformed around complex or tight curves without lifting or shrinking. As it is fuel proof it is also waterproof.

The tape roll contains 8 widths, i.e., 0.5, 0.8, 1.3, 2.1, 3.3, 5.0, 7.0 and 10mm, each having a length of 2.5 metres. The colours we stock are:- black, orange, yellow, white, red, light blue, dark blue, green, silver and gold.

As well as aeromodellers, railway modellers have found a use for it as coach lining, and boat modellers for "boot capping" and waterline marking. The cost is £3.20 per roll

### **MFA Fuel Pump**

Originally intended for pumping Glow fuel, Andy fitted one to his fire boat. The pump serves two fire monitors and on 12volts these have a range of FIFTEEN FEET This pump is also suitable for use as a Bow thrusters. As it can be fitted anywhere in the model it may be used to fit bow thrusters right forward in the bow of a ship using small elbow joints from an aquarium shop and modelling fuel tube. NOT recommended for use in salt water. The cost is £11.30

## MODEL RAILWAYS

### **Hornby, Bachmann, Peco Products, Hornby International**

We are an official Hornby Collectors' Centre and can supply any of the collectors' centre limited editions. To be a Hornby Collectors Centre a shop must carry the full range of Hornby railways products and be an official Hornby Service Centre; this we do and are. Please phone for prices.

We are also carry Bachmann UK locos and rollingstock and can obtain Bachmann American stock together with the continental railway items in the Hornby International range. We stock the Peco Streamline track in N and OO and can obtain the other track gauges made by Peco to customer's order. We also stock a big range of all of the wee bits and pieces wholesaled by Peco and Gaugemaster

## TOOLS.

We carry specialist boat modelling tools by Mantua and Amati as well as a large general range of small tools. Give us a shout if there's anything you need.

### **Daft Definition:-**

**The 50-50-90 principal.....When asked a question by your better half, you have a 50/50 chance of being right. There is a 90% probability that she will tell you that you are wrong anyway.**

## **SCALEXTRIC**

We are a Scalextric Racer Centre and Service Centre. We carry the full range of track, accessories and cars (including limited editions).

**Steve's Tip:-**

**Murderers, if you need to dispose of a body, parcel it up and send it via Royal Mail. It will never be seen again.**

## **PLASTIC KITS**

We stock plastic kits by Academy, Airfix, Fujimi, Hasegawa, Heller, Hobbycraft, Imex, Italeri, Modelcraft, Monogram, Revell, Trumpeter and Tamiya. Obviously we cannot be in stock of the entire range from each manufacturer (we only have a wee shop). We can obtain anything for you provided the importer has it. Please phone for availability.

**That, for now, completes our catalogue.  
Writing it has been a flog.  
Errors a plenty there will be  
And an errata sheet you will soon see.  
For your orders we do yearn  
Send your cheque – we'll post it by return.\***

**(With grateful acknowledgement to William McGonagall of Dundee, poet and tragedian for the inspiration for the above verse.)**

- **NOT now; because of ONE fraudster all cheques will require to clear the banking process before goods are sent out. We are sorry about this as it will slow the whole order fulfilment procedure down. However, this does NOT apply to credit card payment for goods ordered from us.**

**PLEASE NOTE THAT GOODS CAN ONLY BE SENT TO THE CARDHOLDERS ADDRESS**

## **NOTES**

## COME TO ALADDIN'S CAVE

Scotland's all round hobby shop, now with 86 car parking spaces close to the shop and a further 150 spaces within 2 minutes walk.

Model railways by Hornby, Bachmann, Märklin, Ratio, Peco etc.

Scalextric and Hornby Main Servicing Agent.

Radio : Aero - Boat - Car

Scotland's Model Boat Centre, Home of the Scottish Miniature Fishing Fleet.

Top distributor in Scotland for the Mardave RC cars.

A wide range of model aircraft, engines and radio always in stock.

Not only do we stock the big bits, we also keep a comprehensive range of aircraft and boat fittings and ancillaries as well as full spares backup for Mardave cars.

Tools, paints, plastic kits and modelling materials to gladden the eye and lighten the wallet.
